

Leadership has always been important to me because I've always wanted to help others. For me, leadership is about selflessness—putting others before yourself. If elected, that would be my priority: serving the needs of all students.

I'm asking for your vote because I'm passionate about improving our school in ways that benefit everyone.

One of my main goals is to make revision and class resources more accessible. I would encourage students who feel confident with their notes to upload and share them, creating a helpful bank of resources to support others as they prepare for exams.

I also want to increase student involvement in charitable events. Now, many opportunities are shared mainly through Interact or Student Forum, and I'd like to widen access so that all students can get involved. These experiences are not only valuable for personal growth but also helpful for CVs and future applications.

Another priority is making sure that all student concerns are heard and taken seriously. I believe the student leadership team should be approachable and transparent, so I would work to create open lines of communication. I'd also ensure that updates on how concerns are being addressed are clearly shared, so you know your voice is making a difference.

Most importantly, my main priority is your priorities. I want to listen, act, and communicate on your behalf. If elected, I promise to take every concern seriously and keep you informed on the steps being taken to resolve them.

I believe I'm well suited to this role. I've been involved in the Student Forum since Year 7, so I'm familiar with how student leadership works at Whitchurch High School. I've also developed my leadership skills through team activities both in and out of school. I'm organised, fair, and able to prioritise tasks that benefit the most students. I believe that great leaders set aside differences, work collaboratively, and bring out the best in their team—and that's exactly what I would do.

Above all, I want to ensure every student has a voice and feels empowered to help shape our school. A good leader listens first, speaks second, and works hard to create positive change—and that's exactly what I will do if I'm elected as Lead Student.

I'm ready to be someone you can all rely on.
