

I strongly believe I would be the most capable candidate for student lead, as I've proved my competence in skills needed for this role and I'm the type of person who wouldn't let issues get discarded, meaning if staff or students come to me with something they want changed I will do my best to make it happen as I want to make this the best time for students and teachers.

One way I'll be helping students is with their future, because I know how daunting it is to choose the right career path. I will use the Instagram to post career related events and a lot of them will be online and repost helpful accounts for different career paths. This will be beneficial to students as they would be able to use that to guide them. This would also benefit teachers as students are more likely to try harder if they know what they want to do. These work experiences whether in person or virtual will help students immensely for post sixth form such as CVs for job applications and university. Another change I'm planning to make is to make the common room more fun meanwhile keep the study room as a place to study quietly to help students remain concentrated. I am planning to arrange fundraisers to generate money to add fun things such as table tennis, as someone who's ran a company before and has developed financial responsibility skills, proof that I will be competent to know how to make money and allocate it to what people would want (as long as it's reasonable).

A further reason on why I should be elected is because I've proved my ability to be in leadership many times. An example of this is my role as a tutor in my part time where I manage groups of up to 6 children to support them with their gaps in education, which I do to my best ability proving my competence as a figure of authority. Another way I've proved this (as mentioned earlier) is by guiding a group of people who weren't too confident I don't know through a finance group project where we had to present which led to us winning. This also proves my sense of team work, as I am good at uplifting a team which always leads to excellent results, which is a very important skill as I would be working with a group of 5 others.. Another way I've proved my sense of teamwork is when I ran a company and had to work with a team of 6 other people and would share responsibility and provide support in many ways whether it's attempting at producing resolutions or motivation.

A final thing I truly hope to do is make the teachers jobs easier as I understand the weight on their shoulders, I believe by me getting my team and year group to set an example to a high standard alongside all of the above would help achieve this.
